

ITW403 - Web Application Programming

AUIS - Department of Information Technology

Fall-2018

1 Course Information

Course ID	ITW403
Course Title	Web Application Programming
Course Level	Undergraduate
Course Design	Required for all web concentration students General elective for the rest
Number of Credits	3
Prerequisites	ITE303, ITE304 and ITE305
Class Location	B-B1-01
Meeting Time	Mondays from 12:30 to 14:00 Wednesdays from 12:30 to 14:00

2 Instructor Information

Instructor	Yad Tahir, PhD
Email Address	yad.tahir@auis.edu.krd
Office Location	B-F2-15
Office Hours	Sun 15:00-16:30 Thu 9:30-11:00

3 Course Description

This course introduces students to advanced aspects of the World Wide Web and Web applications. Management and operation of Web servers as well as server-side scripting will be introduced and used in project work. An introduction to a server side scripting language such as PHP will be given. Server-side scripting is used in the context of simple online database applications. This course builds on ITE304: Fundamentals of Web Systems to introduce the students to deeper understandings of dynamic Web applications. Detailed coverage of concepts and tools such as server-side scripting languages, database driven Web sites, cookies and user authentications are the main core of the course.

4 Learning Outcomes

Upon successful completion of the course, the students will be able to:

- Understand server-side programming and its role in developing dynamic Web applications.
- Read, analyze, write, and test Web applications written in a familiar server-side programming language such as PHP.
- Develop Web applications that involve user data processing through Web forms and integration of the data to static parts of Web pages.
- Develop database driven Websites using a familiar database management system such as MySQL.
- Recall the concepts and ideas behind HTTP sessions, the use of cookies, and user authentication in dynamic Web applications.

5 Program Goals

- **IT Core 1:** Classify a problem and define computing requirements appropriate to its solution. [Knowledge],[Comprehension]
- **IT Core 2:** Apply knowledge of current techniques, skills, and tools necessary to support best computing practices within the Information Technology field. [Application]
- **IT Core 4:** Identify and recognize user needs in the selection, creation, evaluation and administration of computer-based systems. [Knowledge], [Analysis]

6 Materials and Access

Important material from the text and outside sources will be covered during our scheduled class meetings. Regular attendance and in-class note-taking are critical. This course requires a lot of time, effort and energy. Students are strongly encouraged to **do background reading before and after** each class to gain a better grasp of the material. Corresponding chapters for each lecture will be indicated. The primary references are:

Title	PHP for the Web, visual quick start guide - 5th Edition
Author(s)	Larry Ullman
Publisher	Peachpit Press
ISBN	978-0-134-29125-3
URL	https://amzn.to/2wDOuRX

Title PHP and MySQL Web Development - 5th Edition
Author(s) Luke Welling and Laura Thomson
Publisher Addison-Wesley
ISBN 978-0321833891
URL <https://amzn.to/2xGCG4C>

Title PHP Web Services: APIs for the Modern Web
Author(s) Lorna J. Mitchell
Publisher O'Reilly Media
ISBN 978-1449356569
URL <https://amzn.to/2LV7Qbu>

Most of the material discussed in this course are well-explained in the titles above. These references are optional and can be replaced by any other online sources as long as the required topics are covered.

Going through the following classic textbook is also recommended:

Title PHP MySQL Website Programming: Problems, Design, Solution
Author(s) Chris Lea and *et al*
Publisher Wrox Press
ISBN 978-1861008275
URL <https://amzn.to/2xHF0Ny>

6.1 Slides

The PPT slides of this course are designed to assist the instructor **only**. They contain very limited information. Thus, relying merely on the slides is **NOT** sufficient to this course.

6.2 Required Software

Students are required to use the following software:

- A PHP web server such as Apache HTTP server or WAMP.
- MySQL as a backend database server. This can be any edition.
- A PHP IDE or editor such as Atom, NetBeans ... etc.

7 Grading Procedures

Assessment Type	Grade %
Multiple Quizzes	10
Course Activities	5
2 Coursework Assignments (randomly chosen from out of 4)	20
2 Periodic Exams (20% each)	40
Final Exam	25
Total	100

8 Grading Scale

A	(4.0)	93 - 100	Superior
A -	(3.7)	90 - 92	
B +	(3.3)	87 - 89	Good
B	(3.0)	83 - 86	
B -	(2.7)	80 - 82	
C +	(2.3)	77 - 79	Satisfactory
C	(2.0)	73 - 76	
C -	(1.7)	70 - 72	
D +	(1.3)	67 - 69	Unsatisfactory
D	(1.0)	60 - 66	
F	(0)	Below 60	Fail

9 Attendance policy

Students are expected to attend all scheduled classes, arrive on time, and remain in class until dismissed. Tardiness and early departure are disruptive for students and the teacher and are unacceptable. Attendance will be taken at the beginning of each class.

As per university policy for classes that meet **two** times a week at the **sixth** absence the student will be dismissed from the course with a grade of **F**. This cutoff is **absolute**. Per university policy as stated in the Academic Catalog, there are no excused absences. At the penultimate absence, the professor must notify students via e-mail that they are in danger of failing the course, with a copy to the Dean of Students.

10 Course Policies and Expectations

10.1 Classroom Conduct

In this course, a premium is placed on listening, discussion, and participation. These sorts of activities are only possible in a classroom where the person

speaking is accorded respect. In short, we all should listen to the one person who is speaking.

Students are expected to behave in a collegial manner at all times when in class. Rude, disrespectful, aggressive, or threatening language or behavior will not be tolerated, and students displaying this will be removed from class. Attire should be appropriate for university students. Distracting behavior will not be tolerated, and students behaving in this way will be asked to leave the class. Examples of distracting behavior include:

- **Using a cell phone in any way, shape or form**
- Side conversations while others are speaking
- Speaking languages other than English
- Eating in class
- Any other behavior which a student is warned against during class

Professionalism and ethical behavior are expected from students. Your instructor is not an encyclopedia, nor this course encourages memorization. Instead, this course aims to develop a deep understanding of the material. Students conduct should be guided by the AUIS Honor Code and the AUIS Academic Catalogue (both available online at www.auis.edu.krd).

10.2 Office Hours

All students are invited to visit the instructor in his office, outside of class time. Apart from office hours, students can **make appointments** to visit at other times. Visits during office hours may be used to ask questions about the course material and content, clarify assignments or graded tests, explore ideas or topics related to or extending from the course material, and other course-related matters.

10.3 Makeup Exams and Extra Credit Policy

There are no makeup exams or extra credit available in this course.

10.4 Expectations of Student Time

AUIS adheres to the United States federal definition of a credit hour, as established by the US Department of Education. As a four credit-hour course, you are expected to attend four hours of direct instruction per week, and spend a minimum of eight hours out of class per week in homework, studying, preparing, and otherwise engaging with the material of this course.

10.5 Late or Missed Submissions

Time-management and the meeting of harsh deadlines are part of the soft skills expected of all AUIS graduates. As a result, students should submit all coursework by the published deadline.

A coursework submitted within **72 hours** after the deadline is considered as a **late submission**. Each student can have **two** late submissions. A **penalty of 25 percentage marks** will be applied to each late submission, i.e. the submitted coursework will be graded out of 75%. Any additional late submissions will be awarded a mark of **zero** and there will be no make-ups offered for missed assignments.

10.6 Grade Disputes

Any questions about a grade earned on an assignment or test should be brought to the instructor. All assignments may be discussed in details during office hours, and any disputes concerning grades may be addressed at that time. If there is a dispute concerning the final grade for the course, students have the right to make a formal grade appeal. Details on this process can be found in the Academic Catalog.

10.7 Moodle

This course has a Moodle site that will be used for announcements and posting extra material. Enrollment is **mandatory**. Please make sure that you have enrolled yourself into the right section. The **deadline** is 20th of September and the enrollment code will be provided during the first class meeting.

11 Academic Integrity

Academic Integrity is honest behavior in a school setting. Academic integrity is more than the absence of cheating. It is necessary for students to truly learn new skills and develop as human beings. By struggling with her own studies and by making honest mistakes and discoveries, a student learns about the world and herself. Using another's work inappropriately prevents this intellectual and emotional growth.

Academic Dishonesty (i.e, "cheating") is any form of deceit, fraud, or misrepresentation in academic work. Academic dishonesty is the opposite of learning, because it prevents the student-writer from genuinely learning and responding to material. Plagiarism is one of the most serious forms of academic dishonesty.

Plagiarism is using other people's ideas and/or words without clearly acknowledging the source of the information. If a student uses content or

grammatical structures from the internet, a professional writer, or another student and does not inform the reader, he plagiarizes. A student who allows another student to use his writing without attribution is also guilty of plagiarism.

Cheating will not be tolerated in this class. All major written assignments completed outside of class time must be submitted via www.turnitin.com. A student found to be cheating for the first time will receive a zero for the assignment and the Dean of Students will be notified. In the event of a second offense confirmed by the Dean of Students, the student will fail the course. A third instance of cheating will result in that student being dismissed from the American University of Iraq, Sulaimani. Students are directed to the AUIS Honor Code and the Academic Integrity policy section of the Academic Catalog (available online at www.auis.edu.krd). These documents provide guidance in cases of academic dishonesty, so we should all be familiar with them.

12 Revisions to the Syllabus

This syllabus is designed around the course description proposed and announced to the students. It is subject to change. It is the duty of the instructor to inform students of changes in a timely fashion. Students are obliged to be cognizant of any change.

13 Course Schedule

Week	Starting Date	Topic
1	Sep. 5, 2018	General Introduction
2	Sep. 9, 2018	Introduction to Web Programming and PHP
3	Sep. 16, 2018	Basic PHP Syntax - Part 1
4	Sep. 23, 2018	Basic PHP Syntax - Part 2
5	Sep. 30, 2018	Functional Programming with PHP
6	Oct. 7, 2018	HTTP Methods in PHP
7	Oct. 14, 2018	MySQL and PHP - Part 1 Assignment 1 deadline on 14th of October at 9 A.M.
8	Oct. 21, 2018	MySQL and PHP - Part 2
9	Oct. 28, 2018	Cookies and Sessions Exam 1 on 29th of October
10	Nov. 4, 2018	Secure Web Applications Assignment 2 deadline on 5th of November at 9 A.M.
11	Nov. 11, 2018	PHP Web Services and Web 2.0 Assignment 3 deadline on 11th of November at 9 A.M.
12	Nov. 18, 2018	PHP and JavaScript Programming - Part 1
13	Nov. 25, 2018	PHP and JavaScript Programming - Part 2 Exam 2 on 26th of November Assignment 4 deadline on 25th of November at 9 A.M.
14	Dec. 2, 2018	Comprehensive Review and Course Closure
