

# ITS350 - Introduction to Data Structures and Algorithms

AUIS - Department of Information Technology

Fall-2018

## 1 Course Information

Course ID	ITS350
Course Title	Introduction to Data Structures and Algorithms
Course Level	Undergraduate
Course Design	IT special topic General elective for all students
Number of Credits	3
Prerequisites	ITE303
Class Location	A-B1-01
Meeting Time	Mondays from 09:45 to 11:15 Wednesdays from 09:45 to 11:15

## 2 Instructor Information

Instructor	Yad Tahir, PhD
Email Address	yad.tahir@auis.edu.krd
Office Location	B-F2-15
Office Hours	Sun 15:00-16:30 Thu 9:30-11:00

## 3 Course Description

This course introduces fundamentals of data structures and algorithms. Main topics include data structures such as lists, stacks, queues, arrays, trees, and other advanced data structures used in high level programming languages. Students will also engage in study of algorithmic techniques for hashing, sorting and searching, and the preliminary analysis of such algorithms to determine their complexity and efficiency.

## 4 Learning Outcomes

Upon successful completion of the course, the students will be able to:

- Define and implement data structures, algorithms and programming techniques; including lists, stack, queues, trees, hash tables, sorting and search algorithms;
- Apply the techniques from the course when solving programming/algorithm problems;
- Identify the best algorithm and/or data structure when solving a given programming problem;
- Analyze time and space required for the execution of a program, and recite the role of complexity analysis.

## 5 Program Goals

- **IT Core 1:** Classify a problem and define computing requirements appropriate to its solution. [Knowledge],[Comprehension]
- **IT Core 2:** Apply knowledge of current techniques, skills, and tools necessary to support best computing practices within the Information Technology field. [Application]
- **IT Core 4:** Identify and recognize user needs in the selection, creation, evaluation and administration of computer-based systems. [Knowledge], [Analysis]

## 6 Materials and Access

Important material from the text and outside sources will be covered during our scheduled class meetings. Regular attendance and in-class note-taking are critical. This course requires a lot of time, effort and energy. Students are strongly encouraged to **do background reading before and after** each class to gain a better grasp of the material. Corresponding chapters for each lecture will be indicated. The primary references are:

Title	Data structures and Algorithms in Java - 2nd Edition
Author(s)	Robert Lafore
Publisher	Sams
ISBN	0-672-32453-9
URL	<a href="https://goo.gl/KjMA3p">https://goo.gl/KjMA3p</a>

Title	Introduction to Algorithms - 3rd Edition
Author(s)	Thomas H. Cormen and <i>et al</i>
Publisher	MIT Press
ISBN	978-0-262-03384-8
URL	<a href="https://goo.gl/FesvoH">https://goo.gl/FesvoH</a>

Most of the material discussed in this course are well-explained in the titles above. These references are optional and can be replaced by any other online sources as long as the required topics are covered.

## 6.1 Slides

The PPT slides of this course are designed to assist the instructor **only**. They contain very limited information. Thus, relying merely on the slides is **NOT** sufficient to this course.

## 6.2 Required Software

Students are required to use the following software:

- Java SE Development Kit, version 7 and above.
- A Java IDE such as Eclipse, NetBeans ... etc.

## 7 Grading Procedures

Assessment Type	Grade %
Multiple Quizzes	10
Course Activities	5
2 Coursework Assignments (randomly chosen from out of 4)	20
2 Periodic Exams (20% each)	40
Final Exam	25
<b>Total</b>	<b>100</b>

## 8 Grading Scale

A	(4.0)	93 - 100	Superior
A -	(3.7)	90 - 92	
B +	(3.3)	87 - 89	Good
B	(3.0)	83 - 86	
B -	(2.7)	80 - 82	
C +	(2.3)	77 - 79	Satisfactory
C	(2.0)	73 - 76	
C -	(1.7)	70 - 72	
D +	(1.3)	67 - 69	Unsatisfactory
D	(1.0)	60 - 66	
F	(0)	Below 60	Fail

## 9 Attendance policy

Students are expected to attend all scheduled classes, arrive on time, and remain in class until dismissed. Tardiness and early departure are disruptive for students and the teacher and are unacceptable. Attendance will be taken at the beginning of each class.

As per university policy for classes that meet **two** times a week at the **sixth** absence the student will be dismissed from the course with a grade of **F**. This cutoff is **absolute**. Per university policy as stated in the Academic Catalog, there are no excused absences. At the penultimate absence, the professor must notify students via e-mail that they are in danger of failing the course, with a copy to the Dean of Students.

## 10 Course Policies and Expectations

### 10.1 Classroom Conduct

In this course, a premium is placed on listening, discussion, and participation. These sorts of activities are only possible in a classroom where the person speaking is accorded respect. In short, we all should listen to the one person who is speaking.

Students are expected to behave in a collegial manner at all times when in class. Rude, disrespectful, aggressive, or threatening language or behavior will not be tolerated, and students displaying this will be removed from class. Attire should be appropriate for university students. Distracting behavior will not be tolerated, and students behaving in this way will be asked to leave the class. Examples of distracting behavior include:

- Using a cell phone in any way, shape or form
- Side conversations while others are speaking

- Speaking languages other than English
- Eating in class
- Any other behavior which a student is warned against during class

Professionalism and ethical behavior are expected from students. Your instructor is not an encyclopedia, nor this course encourages memorization. Instead, this course aims to develop a deep understanding of the material. Students conduct should be guided by the AUIS Honor Code and the AUIS Academic Catalogue (both available online at [www.auis.edu.krd](http://www.auis.edu.krd)).

## 10.2 Office Hours

All students are invited to visit the instructor in his office, outside of class time. Apart from office hours, students can **make appointments** to visit at other times. Visits during office hours may be used to ask questions about the course material and content, clarify assignments or graded tests, explore ideas or topics related to or extending from the course material, and other course-related matters.

## 10.3 Makeup Exams and Extra Credit Policy

There are no makeup exams or extra credit available in this course.

## 10.4 Expectations of Student Time

AUIS adheres to the United States federal definition of a credit hour, as established by the US Department of Education. As a four credit-hour course, you are expected to attend four hours of direct instruction per week, and spend a minimum of eight hours out of class per week in homework, studying, preparing, and otherwise engaging with the material of this course.

## 10.5 Late or Missed Submissions

Time-management and the meeting of harsh deadlines are part of the soft skills expected of all AUIS graduates. As a result, students should submit all coursework by the published deadline.

A coursework submitted within **72 hours** after the deadline is considered as a **late submission**. Each student can have **two** late submissions. A **penalty of 25 percentage marks** will be applied to each late submission, i.e. the submitted coursework will be graded out of 75%. Any additional late submissions will be awarded a mark of **zero** and there will be no make-ups offered for missed assignments.

## 10.6 Grade Disputes

Any questions about a grade earned on an assignment or test should be brought to the instructor. All assignments may be discussed in details during office hours, and any disputes concerning grades may be addressed at that time. If there is a dispute concerning the final grade for the course, students have the right to make a formal grade appeal. Details on this process can be found in the Academic Catalog.

## 10.7 Moodle

This course has a Moodle site that will be used for announcements and posting extra material. Enrollment is **mandatory**. Please make sure that you have enrolled yourself into the right section. The **deadline** is 20th of September and the enrollment code will be provided during the first class meeting.

# 11 Academic Integrity

Academic Integrity is honest behavior in a school setting. Academic integrity is more than the absence of cheating. It is necessary for students to truly learn new skills and develop as human beings. By struggling with her own studies and by making honest mistakes and discoveries, a student learns about the world and herself. Using another's work inappropriately prevents this intellectual and emotional growth.

Academic Dishonesty (i.e, "cheating") is any form of deceit, fraud, or misrepresentation in academic work. Academic dishonesty is the opposite of learning, because it prevents the student-writer from genuinely learning and responding to material. Plagiarism is one of the most serious forms of academic dishonesty.

Plagiarism is using other people's ideas and/or words without clearly acknowledging the source of the information. If a student uses content or grammatical structures from the internet, a professional writer, or another student and does not inform the reader, he plagiarizes. A student who allows another student to use his writing without attribution is also guilty of plagiarism.

Cheating will not be tolerated in this class. All major written assignments completed outside of class time must be submitted via [www.turnitin.com](http://www.turnitin.com). A student found to be cheating for the first time will receive a zero for the assignment and the Dean of Students will be notified. In the event of a second offense confirmed by the Dean of Students, the student will fail the course. A third instance of cheating will result in that student being dismissed from the American University of Iraq, Sulaimani. Students are directed to the AUIS Honor Code and the Academic Integrity policy section of the Academic

Catalog (available online at [www.auis.edu.krd](http://www.auis.edu.krd)). These documents provide guidance in cases of academic dishonesty, so we should all be familiar with them.

## 12 Revisions to the Syllabus

This syllabus is designed around the course description proposed and announced to the students. It is subject to change. It is the duty of the instructor to inform students of changes in a timely fashion. Students are obliged to be cognizant of any change.

## 13 Course Schedule

Week	Starting Date	Topic
1	Sep. 5, 2018	General Introduction
2	Sep. 9, 2018	Computational Problems and Algorithms
3	Sep. 16, 2018	Computational Complexity
4	Sep. 23, 2018	Unsorted and sorted Arrays
5	Sep. 30, 2018	Sorting Algorithms - Part 1 <b>Assignment 1 deadline on 30th of September at 9 A.M.</b>
6	Oct. 7, 2018	Sorting Algorithms - Part 2 <b>Assignment 2 deadline on 7th of October at 9 A.M.</b>
7	Oct. 14, 2018	Stacks and Queues <b>Exam 1 on 15th of October</b>
8	Oct. 21, 2018	Linked Lists
9	Oct. 28, 2018	Binary Search Trees - Part 1
10	Nov. 4, 2018	Binary Search Trees - Part 2 <b>Assignment 3 deadline on 4th of November at 9 A.M.</b>
11	Nov. 11, 2018	Hashed Tables <b>Assignment 4 deadline on 11th of November at 9 A.M.</b>
12	Nov. 18, 2018	Graphs - Part 1 <b>Exam 2 on 19th of November</b>
13	Nov. 25, 2018	Graphs - Part 2
14	Dec. 2, 2018	Comprehensive Review and Course Closure
